### Reflexionsangebote der Software Studies

# Software als hegemoniale Artikulation

### Software als subversive Artikulation

flip	an entity that oscillates between two other data types	vector	dir	ompound type representing intensity and ection, consisting of an origin type and a stination type	<>	negotia	reassigns the predicate entity based on a negotiation between it and the subject entity	
full	contains the complete universe of all information and matter	whatev		entity that always matters. It is not defined as part any set (including the set of "whatevers") and nnot be identified through reference to either the rticular or the general.		° norma	ive attaches a political evaluation to a type or code block	
gateway	an associative entity connecting two or more other entities		canno			parasite	establishes a parasitical relationship between two or more entities	
glossolalia	an entity that is readable, writable, or executable only on a hypothetical machine	zombie	a p	rocess that is inactive but cannot be killed	++	privileg	increases the political or social standing of the predicate	
incontinent	an entity that involuntarily expresses itself as any other data type	Operators						
		() cast	st	transform an entity from its current type to a new type	C	Control Structures		
					bo	oredom	executes a code block in a trivial, meaningless way	
infinity	an entity that is unbounded in quality and magnitude	de	base	decreases the political or social standing of the predicate			that often results in dull, tedious, or sometimes unexpected output	
palimpsest	an entity that contains the traces of a previous entity			production of the contract of	ex	ceptional	designates an abnormal flow of program execution	
poltergeist	an entity whose sole function is to invoke another entity	!= di	sassignment	assigns any other entity except for the one specified in the predicate			and guarantees that it will never be handled as an error	
	•				fle	e	a branching construct that moves flow control from	
putrefaction	an entity that only produces its data when deleted	=/ di	sputatio	spontaneously makes further, perhaps useless, distinctions within a given entity			the current instruction to a stray position in the program	
qualitative	an entity with contents that are not numerical in value	:: fig	uration	establishes a figurative relationship between two or more entities	hi	storic	executes a code block by evaluating an entity according to its current value as well as all previous values	
random	expresses a random entity from a random type	- h	ybrid	combines two or more entities into a new hybrid entity cast from the "empty" type	m	aybe	allows for possible, but not guaranteed, execution of code blocks	
topology	an arrangement of interrelated, constituent parts	?+ m	inna	assigns new values to preexisting entities, the meaning of which is known only to the machine	no	ever	guarantees that a block of code will never be exe-	
unknown	an entity that cannot be specified, identified, or evaluated in any intelligible way						cuted. This is similar to block quotes in other languages, except that "never" blocks are not removed during compilation.

#### Our Mission

Mukurtu (MOOK-oo-too) is a grassroots project aiming to empower communities to manage, share, preserve, and exchange their digital heritage in culturally relevant and ethically-minded ways. We are committed to maintaining an open, community-driven approach to Mukurtu's continued development. Our first priority is to help build a platform that fosters relationships of respect and trust.

#### Plateau Peoples' Web Portal

This portal is a gateway to the cultural materials of Plateau peoples that are held in Washington State University's Libraries, Manuscripts, Archives and Special Collections (MASC), the Museum of Anthropology and by national donors. The collections represented here have been chosen and curated by tribal consultants working in cooperation with University and Museum staff. Click on the "About" tab for more details.

#### Coeur d'Alene

hu, ku ch-n'ułkhw. The ancestral territory includes almost 5,000,000 acres of what is now north Idaho, eastern Washington and western Montana. Coeur d'Alene Indian villages were numerous and permanent, each village and the people there had a distinct name in the ancestral language. Collectively, members today call themselves, "Schitsu'umsh," meaning "Those Who Are Found Here."

#### Colville

The Colville Confederated Tribes are comprised of 12 bands which include, the Moses-Columbia, San poil, Nespelem, Methow, Entiat, Colville, Lakes, Wenatchee (Wenatchi), Chief Joseph's Band of Nez Perce, Palus, Southern Okanogan, and Chelan. Our ancestral lands incorporated approximately thirty nine million acres in Central Washington and Southern British Columbia. Our ancestors made their living off the land, following the seasons and the resources. We govern our people in unity, maintain our ancestral ways, and strive to document our history.

V.

Fazit

#### These I

Software und ihre (praktischen, ästhetischen, kommunikativen, sozialen, ökonomischen, politischen) Logiken sind für Subjektivations- und Orientierungsprozesse konstitutiv.

"Software" steht in diesem Sinne nicht für die Anwesenheit von Medienappaturen, sondern vielmehr für die Appräsenz von Strukturen, innerhalb derer Sozialität und Selbstbezüge sich entfalten.

Die Bildungspotenziale digitaler Architekturen – und damit der heutigen digitalisierten Welt – werden beschränkt durch hegemoniale Effekte auf der Ebene des Designs von Software (Code, Datenformate, Daten und begrenzte Kreise von Akteuren).

Designtheorie stellt dabei bildungstheoretische anregende Perspektiven bereit, da sie Wissen, Dinge, Programmatiken, Performanzen und Akteure systematisch aufeinander bezieht.

Aus Perspektive der Medienbildung stellt Software einen wohl unhintergehbaren Forschungsgegenstand dar, der allerdings – im bildungstheoretischen Interesse – medien- und kulturtheoretisch integriert werden muss.
